How to get up and running quickly with Microsoft Surface

Choose the right Surface device for each employee—and save time with smart, secure deployment options.

**Stage 1**

**Portability First.** They frequently work on the move, and want a mobile device for everyday tasks.

**Performance is key.** They need to run professional, graphics-intensive apps, but also want to work remotely.

**Transitions from desktop to drafting table.** They work mainly in the office, and want a tool to both create and share ideas.

**How will you manage apps, data, and settings?**

**Stage 2**

**How are you going to deploy the devices?**

- **Individually**
  - A one-off deployment for an individual business user
  - Takes about 1 day
  - Note the serial number to enable auditing of your financial assets
  - Unbox the device and power it up

- **As part of a mass deployment**
  - Aligned to scale to multiple users

**Are you using modern, zero-touch deployment?**

- **Yes**
  - Access to tools, processes, and guidance for automating deployment
  - Reduced deployment time
  - Improved security and configuration management
  - Reduces deployment time to just 1 week

- **No**
  - Support your diverse mobile ecosystem
  - Achieve IT efficiencies in the cloud
  - Protect data with or without device enrollment

**Stage 3**

**How will you manage apps, data, and settings?**

- **Cloud-based**
  - Use Microsoft Intune as part of Microsoft 365
  - Support your diverse mobile ecosystem
  - Achieve IT efficiencies in the cloud
  - Hybrid data will or without device enrollment

- **Hybrid**
  - Use co-management, you can use System Center Configuration Manager and Intune to achieve hybrid deployment to your own pace
  - Learn more about co-management

- **On-premises**
  - Use Microsoft System Center Configuration Manager
  - User familiar tools to get the benefits of Surface devices, hybrid and adopt cloud-based solutions when they make sense for your business
