

# Transform your business

Perform better with AI-Powered ERP

## Transforming for efficiency

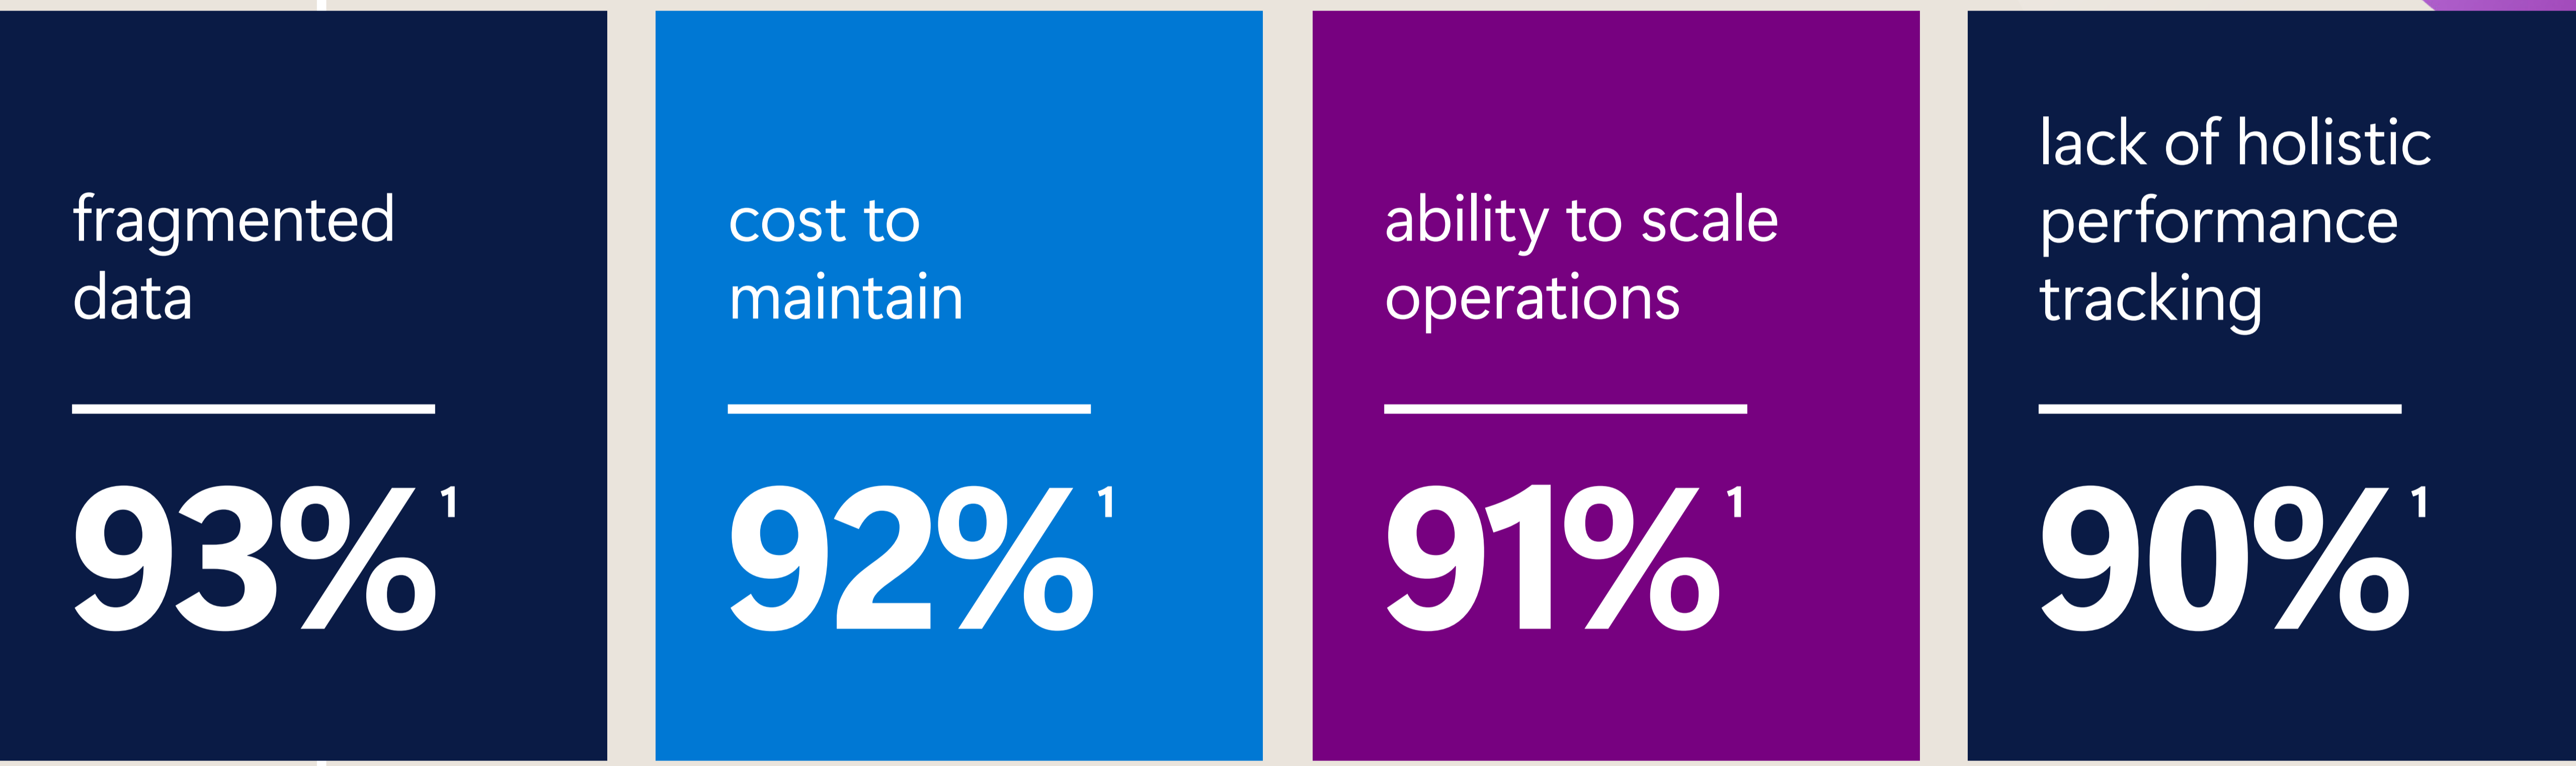

Amidst a disruptive market, business leaders are under pressure to deliver increasingly better performance. To meet this demand, many are adopting flexible, modern ERP systems that unlock a slew of benefits, including greater operational efficiency. But almost two-thirds are in jeopardy of falling behind in the transformation race, slowed by inflexible tools.

### Technology friction

Business leaders highlight a few clear pain points with their current ERP systems, most often struggling with fragmented data and lack of transparency.

## Leaders who utilize multiple ERP software are concerned about:

## Gain confidence, perform better with finance and operations management from Microsoft Dynamics 365

To truly perform better in the current market, leaders must have a consolidated, agile ERP that allows them to move beyond these pain points. Teams can have confidence in their systems with a holistic view of data and performance in three ways with Dynamics 365:

Gain transparency into business metrics with real-time data access across business sectors

Give teams collaboration tools built into the workflows and software they already use

Support project and resource management with AI-powered assistants and automation
