What are some practical ways we can help IT leaders better understand a department’s mission and activities?

Tel Aviv engages citizens with innovative digital services, public participation.

Hybrid and edge solutions help you make the most of what you have today.

Virtualization and containers allow you to move applications to the cloud with fewer changes.

Cloud-based development supports experimentation, proof of concept, and pilot efforts at low cost.

Cloud data, identity, and security enable greater collaboration with less risk.

How can we work together to improve service delivery and ensure continuity?

Provincial government goes digital to spark proactive civic engagement.

Clear vision

Effective technology transformation in government focuses on outcomes and prioritizes technology choices accordingly, rather than starting with technology as a limiting factor.

What improvements does your technology transform to the world and its organization?

How do you measure them — and the impact of technology on advancing them?

Who is doing this right to government and industry right now? What does their journey look like?

Leadership collaboration

The relationship between departmental and IT leaders is the bedrock of technology success. Seeking shared benefits, such as resiliency, agility, security, and responsiveness, can be a bridge to mutual understanding.

What are some practical ways we can help IT leaders better understand a department’s mission and activities?

What can you do hand in hand as a leader to understand it better?

How can we work together to improve service delivery and ensure continuity?

Organizational buy-in

Build your business case by looking to examples of successful government digital transformation.

Digital transformation can be accomplished incrementally without wholesale replacements of existing technology.
