

Choose Your Windows 11 Deployment

Designed for seamless, secure hybrid work

Windows 11 is specifically designed to help employees focus better, collaborate more meaningfully, and work seamlessly across their work and personal devices.

And for IT teams, Windows 11 makes it easier to deploy new desktops, implement passwordless security, and unify governance—across your entire organization.

Deployment

Windows 11 Enterprise E3

Windows 365

Azure Virtual Desktop

Description

Ideal for native deployment to modern devices to deliver personalized apps and service experiences.

A complete software-as-a-service (SaaS) solution that streams your employees' Windows 11 experience as a Cloud PC to any device.

A flexible platform-as-a-service (PaaS) solution to deliver Windows 11 virtual desktops and remote apps with maximum control.

Optimized for

Cost efficiency.

Simplicity.

Flexibility.

Service

Device-native. Full control over configuration and management by IT admin—and integrates with existing management toolsets.

Connects to Windows 365 for remote desktop, and to Azure Virtual Desktop for remote app experiences, when needed.

SaaS. Complete end-to-end Microsoft service.

Enterprise edition: Administer Cloud PCs alongside physical PCs in Microsoft Endpoint Manager.

Business edition: Administer Cloud PCs anytime through windows365.microsoft.com.

PaaS. Granular controls over configuration and management.

Administer through the Azure portal.

Pricing

Predictable. Per user, per month.

Predictable. Per user, per month.

Flexible. Usage-based, billed monthly.

User experience

Personalized single-session desktops with local apps in connected and disconnected scenarios.

Personalized single-session desktops.

Personalized and multisession desktops for Windows 11 and Windows Server, with remote app streaming.

Windows 10 compatibility

Can run in the same environment.

Can run in the same environment.

Can run in the same environment.
